

Income STREAMS III

Capital Yield Share

Monthly Income and Principal Protection

STQ

The investment focus of Income STREAMS III is to provide a high level of steady, tax efficient monthly income while preserving capital. Forward Agreements with Financial Institutions provide 100% principal repayment of the original \$25 per share issue price upon termination. The Capital Yield Shareholder also has the potential for capital appreciation above the original investment from any residual balance in the Managed Portfolio once the Equity Dividend Shareholders obligation has been met.

Quadravest uses a sophisticated screening process to select high quality blue chip companies from the S&P 500 and the TSE/S&P 60 and combines this with a covered call writing strategy. This proven strategy has allowed Quadravest to meet or exceed distribution targets for all products under management. This strategy not only provides tax efficient income, but also reduces the already conservative risk profile of the investment.
