

ETF FACTS

QUADRAVEST PREFERRED SPLIT SHARE ETF – CAD UNITS PREF June 7, 2024

This document contains key information you should know about the Units of QuadraVest Preferred Split Share ETF. You can find more details about this exchange-traded fund (ETF) in its prospectus. Ask your representative for a copy, contact QuadraVest Capital Management Inc. ("QuadraVest") at (416) 304-4443 or info@QuadraVest.com or visit www.quadraVest.com.

Before you invest, consider how the ETF would work with your other investments and your tolerance for risk.

This ETF will be an alternative mutual fund. It will be permitted to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. The specific strategies that differentiate this ETF from conventional mutual funds include the ability to invest more than 10% of its net asset value in the securities of a single issuer. While these specific strategies will be used in accordance with the ETF's investment objectives and strategies, during certain market conditions they may increase the volatility of your investment.

WHAT DOES THE ETF INVEST IN?

The investment objectives of the QuadraVest Preferred Split Share ETF are to provide Unitholders of the ETF with: (a) monthly distributions and (b) the opportunity for capital preservation primarily through investment in a portfolio of preferred shares of split share corporations. The ETF may also invest in preferred shares of other issuers, exchange-traded funds, other investment funds, equities or income-generating securities, and securities that are convertible into any of the above noted securities provided such investments are consistent with the ETF's investment objectives.

The charts below give a snapshot of the ETF's investments on June 7, 2024. The ETF's investments will change.

HOW RISKY IS IT?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

RISK RATING

QuadraVest has rated the volatility of this ETF as **Low**.

Because this is a new ETF, the risk rating is only an estimate by QuadraVest. Generally, the rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

QUADRAVEST PREFERRED SPLIT SHARE ETF – CAD UNITS

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

NO GUARANTEES

ETFs do not have any guarantees. You may not get back the amount of money you invest.

HOW HAS THE ETF PERFORMED?

This section tells you how the Units of the ETF have performed, with returns calculated using the ETF's net asset value (NAV). However, this information is not available because the ETF is new.

Year-by-year returns

This section tells you how the Units of the ETF have performed in past calendar years. However, this information is not available because the ETF is new.

Best and worst 3-month returns

This section shows the best and worst returns for the Units of the ETF in a 3-month period. However, this information is not available because the ETF is new.

Average return

This section shows the value and annual compounded rate of return of a hypothetical \$1,000 investment in Units of the ETF. However, this information is not available because the ETF is new.

TRADING ETFS

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs.

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can affect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: bid and ask.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the "bid-ask spread".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net Asset Value

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the day.

WHO IS THIS ETF FOR?

Investors who:

- are looking to receive reliable stable dividend income;
- are looking to preserve capital;
- are looking for exposure to preferred shares of split share corporations; and
- can accept some variability of returns.

A WORD ABOUT TAX

In general, you will have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

HOW MUCH DOES IT COST?

This section shows the fees and expenses you could pay to buy, own and sell Units of the ETF.

Fees and expenses – including any trailing commissions – can vary among ETFs. Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell Units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF's returns.

The ETF's expenses are made up of the management fee, operating expenses and trading costs. The ETF's annual management fee is 0.5% of the ETF's value. As this ETF is new, operating expenses and trading costs are not yet available.

WHAT IF I CHANGE MY MIND?

Under securities laws in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase or, in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.
